## Yosemite

**C**HURNED TO FROTH in its wild leap, Yosemite Falls plunges with such force that the ground trembles at its base. Upper Fall, Middle Cascade, and Lower Fall plummet a combined 2,425 feet—North America's loftiest cataract.

Swollen by spring melt, the falls fill Yosemite Valley with its thunderous roar. In early summer the waning waters whip in the wind like a gossamer veil. By mid-August only a tear trickles down the canyon face.

Pressed between sheer rock walls half a mile high, Yosemite Valley follows a seven-mile gorge carved by glaciers and the Merced River. From hanging valleys high above the river spill many other spectacular falls, including Bridalveil, Ver-

nal, Illouette, Nevada, and Ribbon, which drops 1,612 feet, longest single fall on the continent.

Yosemite became a national park in 1890, a few days after nearby Sequoia attained park status.

Yosemite firefall rains a  
river of embers down the  
face of Glacier Point.

Each summer evening  
a bonfire of bark from  
fallen trees blazes atop  
the cliff. Dying, it leaves  
a huge bed of glowing  
embers. As twilight deep-  
ens into night, an expect-  
ant hush invades the forest.

sounds in the darkness.  
"Let the fire fall," and  
men with long-handled  
rakes push the coals over  
the brink. As if in slow  
action, the fiery torrent  
drifts toward the canyon  
floor, consuming itself as  
it falls.

— From "The Canyon,"  
in *Men of the West*, by  
John Wayne, 1960.
